

Two Problems, One Solution: Working with University Laboratory's

Michael J. Berman*

Micro/Nano Fabrication Center, College of Engineering, University of Arizona 85721

Entrepreneurs have many great, new high-tech ideas, but often they lack the knowledge of how to overcome the barriers on the path from idea to prototype to volume production.

In this paper, we will examine some of the barriers and bridges during this transformation. The proposal at the heart of the paper will help the entrepreneur and help support University laboratories, a win-win situation for all parties.
