

Eugene Smirnov

Eugene Smirnov was born in 1988 in Tver. In 2003-2005 he was studying at the Aspecialised Educational Scientific Center (AESC) Lomonosov MSU (Kolmogorov School). Then Eugene entered the Department of Material Sciences Lomonosov MSU, and in 2011 he obtained the Master's Degree in Chemistry (the theme of thesis: "Titania microspheres with high specific surface area: synthesis and properties"). Now he is a PhD-student at the Department of Material Sciences Lomonosov MSU. His scientific work is devoted to application of titania particles in ultra-performance liquid chromatography (UPLC) and radionuclide sorption. Also Eugene's interests are focused on visualization of usual objects using electron as well as optical microscopy and AFM.

During his education in MSU he was awarded the best student of MSU-2007, the prize-winner of I, II, III, IV and V Internet-Olympiad in Nanotechnology and the prize-winner of grant program the Vladimir Potanin Foundation in 2007/2008 and 2009/2010.
