

Nikolay Suetin

Nikolay Suetin received his Master Degree (with Honors) in physics from Moscow State University, in 1979. His Ph.D. and Doctor degrees in plasma science and technology were awarded by Moscow State University, in 1982 and 2003, respectively.

From 1985 to 2003 Dr. Suetin was Chief Senior Researcher, at Moscow State University, Institute for Nuclear Physics Research. He was leader of scientific group and research projects related to experimental and model study of new materials, CVD and etching processes, responsible for the supervising PhD and diploma students.

In 2003 he joined Intel Corporation and was Strategic Business Development Manager. Now Dr. Suetin is responsible for Intel external R&D projects in CIS.

Nikolay is author of more than 20 patents and 200+ scientific publications in HPC, physics, chemistry, nanomaterials and electronics.

He has extensive experience in project management of national and international levels. Dr. Suetin is an expert for Russian Nanotechnology Corporation and Russian Venture Company. He is a member of the Microelectronic Systems Conference Scientific Committee.
